## **DETAILED ACTION**

### ***Continued Examination Under 37 CFR 1.114***

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 4/1/09 has been entered.

## **EXAMINER'S AMENDMENT**

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended as follows:

### **In the claims**

Cancel claims 24-37.

### ***Allowable Subject Matter***

Applicant has amended the independent claims 1 to overcome the prior art rejection of the previous office action. Claims 1-23 are allowed. The following is an examiner's statement of reasons for allowance:

The prior art of record does not disclose or suggest either in singularly or in combination the following limitations and other elements in the claims:

- The active layer is a single quantum well structure formed of a single well layer or comprises at least one well layer in a multiple quantum well structure, the active layer comprising a thick portion and a thin portion being disposed irregularly within a single well layer, where the active layer has a flat surface (on the substrate side) and an uneven upper surface so as to form the thick portion and the thin portion.
1. Reference Lee (US Pub. 2004/0099858) discloses a quantum dots structure with regular size dots in a single quantum well layer.
  2. Reference Narayan et al. (US Pub. 2003/0160246) disclose an LED with irregular quantum well layers, but do not disclose a flat bottom surface and an uneven upper surface.
  3. Reference Saito et al. (US 6,121,634) disclose indium island formed in the quantum well layer, but do not disclose a thick portion and a thin portion being disposed irregularly within a single well layer, where the active layer has a flat bottom surface and an uneven upper surface.

Therefore, the above references do not disclose the claimed invention of present application and claims 1-23 are allowed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue

fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Wai-Sing Louie whose telephone number is 571-272-1709. The examiner can normally be reached on 7:30 to 5:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Wael Fahmy can be reached on 571-272-1705. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
